About Us

COELHO Finance

A new powerful tool to help you make informed investment decisions, track your investments and identify opportunities.

UNIMARKET

Analyze individual stocks

COELHO Finance provides comprehensive analysis of individual stocks and indexes from 40+ countries, including financial statements, price charts, analyst ratings and several business indicators about each stock price. This information can help you identify undervalued stocks with the potential for growth.

UNISTATS

Get statistical informations

COELHO Finance brings to you statistical models as outlier detections, moving averages, forecast models, anomaly detection, volatility models and Monte Carlo simulations.

This tool provides information for general purposes and should not be taken as investment advice. It doesn't account for individual financial circumstances or goals.

Users should make investment decisions based on their own financial needs and risk tolerance, and consult with a professional advisor. Past performance of securities or strategies doesn't guarantee future results. The tool's creators are not responsible for any financial decisions or losses resulting from its use.
